

Palace Inn - Branson, Missouri

"Over these many years the technical advice during the design phase as well as the flawless production of the precast components has helped us to deliver to our clients many exceptional projects with many long term benefits."

"I can recommend Prestressed Casting to anyone who is looking for cost effective, high quality prestressed concrete building components"

- Geoffery H. Butler A.I.A.
Butler, Rosenbury and Partners, INC
President and CEO

HOTELS, MOTELS, DORMITORIES and CONDOMINIUMS

Quality Construction Precast short term lodging structures, including hotels, motels, dormitories, and condominiums, offer better quality and value than traditional building materials. With precast construction, owners and future residents can expect low sound transfers, optimal fire protection, and condensed construction schedules.

Team Cooperation Prestressed Casting Company will work with other subcontractors to provide a superior overall project. Coordinating penetrations for plumbing, HVAC, and other similar trades helps the overall speed and productivity of a project.

Energy Efficiency Due to precast concrete's natural thermal mass properties, building a structure with precast concrete will increase savings in energy costs.
